

# Ground Plug & Cable

## DESCRIPTION

The control monitor connects to a heavy duty Sculcon® junction box with attached cable and special quick release snap-on plug. The Scully Ground Plug connects to a specially designed electronic Scully Ground Ball mounted on each vehicle. The controller in conjunction with the ground ball provides and verifies vehicle grounding before loading can begin. The controller must receive an electronic return signal from the ground ball throughout the loading operation.

*Sculcon Junction Box  
with Ground Plug & Cable*

## ORDERING INFORMATION

Description	Part Number
